CERTIFICATE

Sto SE & Co. KGaA

Ehrenbachstraße 1 · D-79780 Stühlingen

have voluntarily subjected their product

StoColor Puran Satin

to inspection and testing according to the

TÜV SÜD Test Standard TM 21
"Two-component coating materials for floor and wall surfaces in interiors Issue 02-2021"

The examination has furnished proof that the standard mentioned above is fulfilled in its entirety.

Pollutant tested building materials:

- Testing of health-related contents and emissions
- Regularly product and process monitoring
- Control of the raw materials

www.tuev-sued.de/oekologische-produktpruefung

Sto SE & Co. KGaA are granted the right to use the
TÜV Mark >> Low emission, Pollutant tested and Production monitored <<
according to contract.

This certificate is valid until 2027-03-31

Certificate-Nr. TM-21 / 240423-1

Evaluation of the emission characteristics and toxic and environmentally relevant constituents of Sto-Color Puran Satin

On behalf of Sto SE & Co. KGaA, TÜV SÜD Industrie Service GmbH tested a sample of the 2-component paint **StoColor Puran Satin** regarding the criteria for the award of the TM-21 TÜV mark, "low-emission, free of nonylphenol, production monitored".

The emission characteristics were tested in an emission test chamber, under conditions like those in found practice. The results are described in detail in test report No. 24-S1428-24, dated 2024/04/22.

StoColor Puran Satin is a low-emission and free of nonylphenol paint.
From the paint **StoColor Puran Satin** was emitted no formaldehyde, as well as no benzyl alcohol.

StoColor Puran Satin meets the stringent criteria of TÜV SÜD´s test standard TM-21 “two-component coating materials for floor and wall surfaces in interiors" issue 02-2021.

Under normal processing and application conditions (see the current version of the technical data sheet), no adverse effects on the processor or user are expected.

Yours faithfully,
